Solar-Powered Garden Lights

Our ever-popular, top-rated Solar-Powered Garden Lights are back... and they've had a new spring makeover! Available this year in stainless steel, plus three bright plastic colors, they're sure to be a favorite again for gardens and pathways all across the country. Even though they have a brand new look, they still have the same 'ol fantastic \$1 price! Where else can you get a stainless-steel garden light for only one dollar?!

Here are some ideas for your Solar-Powered Garden Lights from our staff:

- Add a pop of color and some ambient lighting to your gardens and outdoor spaces — the lights are powered by the sun and come on automatically at dusk, so lighting up your outdoor spaces won't cost you a dime in electricity.
- Light up a dark driveway or pathway — keeps visitors from losing their way, plus it gives your house a little curb appeal.
- Put them in decorative pots, weighted down and stabilized with glass floral gems (pots and gems are also available from Dollar Tree), and place them around your outdoor spaces during parties and get-togethers... it's an inexpensive way to add a little extra mood lighting.
