DIY Designer Frame

If you love to add a personal decorative touch to everything you do, then this fun idea is right up your alley! Stop by Dollar Tree and check out our great selection of frames. Pick some of your favorite sizes and shapes, then use this idea to update them with a little decorative pizzazz. In a few simple steps, and for about \$3 bucks, you can transform our sleek frames into a trendy decoration that will make a statement in your home or office... or give them as gifts!

Shop at Dollar Tree – Here's What You'll Need:

- Frame(s)
- White Glue
- Paint (we used white, but you could use whatever color matches your décor)
- Paintbrush

Easy Step-by-Step Directions:

1. Remove the glass and the back of the frame.
2. Wipe the frame clean — this will help the glue and paint adhere properly.
3. Use the white glue to draw a design on the frame. Simply squeeze thin lines of glue onto your frame in the design(s) of your choice.
4. When the glue is completely dry, paint one to two layers of paint over top of the frame and the glue. If you do two layers, allow the first layer to dry completely before painting the second layer.
5. Once the paint is completely dry, put the glass back in the frame, add your favorite photo or printable, replace the backing, and display. For a cute Valentine's decoration, hunt for our **L-O-V-E Printable** on this month's Value Seekers Club page.
