## River Rock Table Runner

Here's the perfect idea to bring a designer look to your dining, foyer, or coffee table for a fraction of the designer cost! Plus, it's a great way to protect your tables, too. This simple, yet beautiful, river rock table runner is crafted from just a few items from Dollar Tree. It's part puzzle, part craft, and completely gorgeous when it's done. Just don't be surprised when all of your friends and family end up making one for themselves!

### Shop at Dollar Tree – Here's What You'll Need:

- 5-6 Bags of River Rocks
- 12x30" Vinyl Shelf Liner
- Glue

### Easy Step-by-Step Directions:

1. Remove the river rocks from the bags and spread them out on your work surface so they are all visible.
2. Glue the river rocks to the shelf liner one by one so that they fit together as closely as possible. Select smaller rocks to fit between the larger ones to cover the entire liner.

### Fun Tips:

- Try using glass luster gems or our smaller river stones in place of river rocks for a different look.
- Use this technique on a longer shelf liner to create a runner that goes the length of your table. You will, of course, need several more bags of river rocks to cover the longer liner.
