Glitter Party Glasses

If your halls are decked with sparkle, twinkle, and shine, then these glitter party glasses are the perfect craft for you! They add a little color and sparkle to your table décor... perfect for a glitzy party or fun get together with your closest friends. The best part is all the items you need are available at Dollar Tree for just \$1 each — that's a lot of glam for just a few bucks! You can apply a glitter color that matches your party theme, or stick with a classic like silver or gold, and reuse the glasses for all your parties for years to come. This same technique can be applied to vases and candleholders for a sparkly wedding décor idea.

Shop Dollar Tree, Here's What You'll Need:

- Glasses (wine glasses, vases, candleholders, etc.)
- Glitter (the bigger the pieces of glitter the better)
- Non-Toxic White Glue
- Paint Brush
- Tape, Optional (something low-tack works best, like masking tape or painter's tape)

Easy Step-by-Step Directions:

1. Wash and dry your glasses. This will allow the glue to properly adhere to them.
2. Prepare the glitter by mixing it with the glue. About $\frac{1}{2}$ tbsp. of glitter to 2 tbsp. of white glue. Mixing the glitter and the glue will keep the glitter from rubbing off.
3. Paint thin layers of the glittered glue on the outside of the glass (be careful not to add glitter to the top 1" of the glass where you drink from). Allow each layer to dry before painting the next layer. Keep layering until you reach your desired effect/color depth.
4. Keep in mind that once the glasses are painted, they are no longer dishwasher safe and must be washed by hand.

Fun Tips:

- Get creative with patterns! Using a low-tack tape, make designs on your glasses such as stripes, zigzags, or a chevron pattern. Simply tape off the design area prior to painting on the glitter, then carefully remove the tape before the glue dries.
- If you love a sparkly Christmas, then hunt for our **Puttin' on the Glitz Christmas Tablescape** on this month's Value Seeker's Club page.
