

GLOBAL CORPORATE TRUST SERVICES

Financial strength. Local expertise. Global reach.

Today's Relationships. Tomorrow's Technology.

It's Here – Experience U.S. Bank pivot, a powerful web tool from Global Corporate Trust Services

U.S. Bank Global Corporate Trust Services is pleased to announce the launch of pivot, a specialized client portal specifically for asset manager experts specializing in Collateralized Debt Obligations (CDOs). Pivot streamlines daily cash activity and monthly reconciliation, gives users greater confidence to make investment decisions and enables them to react faster to changes in the market.

"The new pivot client portal is a market-leading advancement built with direct input from our clients," said U.S. Bank Global Corporate Trust Services President Bryan Calder. "This go-to tool meets evolving client demands to provide greater transparency for more efficient portfolio management."

This is the first phase of pivot. U.S. Bank will continue to invest in technology and resources to expand pivot functionality for U.S. Bank institutional clients utilizing securities-related products and services such as specialized asset servicing and administration through trusteeship, paying agent, custodian, fund administration, and asset management.

With a single access point for all data, pivot puts the client's important information front-and-center, including critical alerts about upcoming deal milestones, pending trades and unexpected changes to the portfolio. Tracking tools keep abreast of and analyze portfolio trends to optimize deal performance.

To learn more about pivot, the most recent technology advancement delivered by U.S. Bank Global Corporate Trust Services, contact your local Relationship Manager or visit us online at: www.pivot.usbank.com.
